

LOOKING FOR STUDENT ASSISTANT (HiWi) for the work on synthetic dataset creation

Augmented Vision
Department of German
Research Center for
Artificial Intelligence
(DFKI) offers a research
assistant position for
CS/Math students of TU
Kaiserslautern.

Contract term: 3 months
(with possible extension).

What we will be doing:

- Creating a synthetic dataset consisting of 3D geometries of thin sheet (e.g. paper) deformations, rendered with different shadings and textures, used for further processing by deep learning methods
- Corresponding literature research

What we expect:

- Your interest in Computer Graphics/Computer Vision
- Your good knowledge of C++/C# or Python
- Your experience in Unity/Blender and Meshlab

What you get:

- 8 hours/week research assistant contract in the worldwide renowned institute with possible further collaboration
- Hands-on experience in actual technologies
