

HiWi Position for annotation and dataset creation with 360° images and point clouds

The *Augmented Vision (AV)* research department at DFKI Kaiserslautern is looking for a HiWi to assist in annotating a spherical image dataset in the context of the HumanTech research project.

Your tasks:

- Annotating images with semantic segmentation masks
- Refining annotations using point cloud representations of the data
- Writing scripts to (re-)organize data and annotations if necessary

What we expect:

- Reliability and a conscientious way of working
- Good communication skills in English
- Basic programming skills (e.g. in Python) are desirable

What you get:

- Practical experience in the context of AI research

Please send your application (CV and transcripts) in electronic form to:
Mahdi Chamseddine (mahdi.chamseddine@dfki.de)

Feel free to contact us if you have any question regarding the position.
